

Experience

● **SPS Commerce**
Senior Product Designer

February 2016 - Present

Revitalizing a withering enterprise platform by applying design methodologies that increase communication between customers and decision makers. Simplifying a very complicated application into an experience that anyone can pick up. Increasing the velocity of the design/development process by establishing pattern libraries and style guides.

● **When I Work**
Lead UX Designer

July 2015- August 2015

Introduced design thinking to new features for the mobile and desktop app to better understand the customers by applying user testing to prototyped solutions. Worked towards building a process for starting a design team.

● **The Nerdery**
Senior UX Designer

November 2011 - April 2015

Worked between visual designers and UX researchers to wireframe large desktop and mobile applications to decrease the budget of development. Educated fellow designers on best practices for the web through series of presentations/lectures. Increased engagement of the development and design community within the company culture.

● **The Nerdery**
Front End Developer

August 2011 - November 2011

Created clean, semantic HTML/CSS for marketing websites. Worked with designers to help prepare design assets best suited for development to expedite workflow and reduce the budget. Worked with teams big and small to strategize the order in which code could be built in succession.

Education & Achievements

Delta College
Network Technology - AAS

Research in network administration and development of network maps, servers, and infrastructure. Learned methods of modeling system diagrams and constraints of technology. Studied programming and system design in parallel with other information technology concepts.

Conference Speaker
IOT Fuze - 2015

Speaker on the topic of internet connected devices to create a "smart office". Shared ideas of design thinking when approaching embedded devices and revealed a prototype for tracking conference room availability.

Tutorial Creator
Adafruit.com

Contributor of official tutorials for the tech community to educate makers on connecting their devices to the internet. Created a featured guide about how to build an indicator for a series of conference rooms or bathrooms at an office which relays the availability to a website and mobile app.
